

DATACOM

Power BI Accelerator

The fast, low-risk way to unlock the power of your business data

Data is pervading every aspect of your business. Unlocking its potential to create value and build a competitive advantage is a key challenge.

Success largely depends on how you look at your data: the right visualisation can give you fresh, accurate, actionable insights – even foresights. But developing it can be a complex, lengthy process that demands a hefty investment. Such projects can sometimes take so long that businesses' requirements change before their done.

The solution is Datacom's Power BI Accelerator. It's the fast, low-risk and cost-effective way to start getting big benefits from your business data.

Benefits of the Power BI Accelerator:

Short time-to-value

Low investment

Low risk

Proof of concept for a broader business case

New understanding of your data's true potential

Custom-made data model and rich Power BI dashboard

Datacom's Power BI Accelerator

Datacom's Power BI Accelerator unites your people with one of our skilled Business Intelligence (BI) consultants. Together, using agile methodology, we develop and produce, over a two-week period: a new **data model** – embedded in Power BI – that is tailored to specific requirements and data; and a fully functional Power BI **dashboard** that delivers value straight away. All we require is a key subject area to focus on and access to both subject matter experts (SMEs) and relevant data. SMEs take part in an initial half-day scoping workshop, and then need to be available for at least one hour per day over the following two weeks.

At the scoping workshop, business requirements are confirmed and possible data visualisations are 'dreamed up' with the help of the consultant. They then build a data model, which forms the basis of the data visualisation.

The dashboard is developed over two 'mini-sprints', with a user presentation and feedback session at the end of each. This approach ensures the final output meets both business requirements and users' expectations.

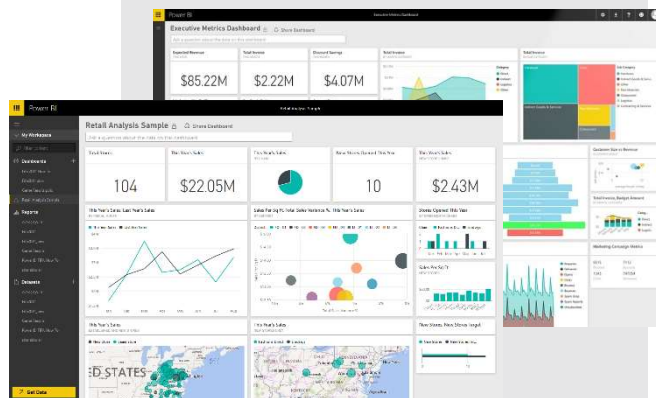

You can use the dashboard on its own, and as a proof of concept for other, more ambitious projects – employing the understanding gained from the Power BI Accelerator exercise to dream big. Our team of experts can help you every step of the way.

Why Datacom?

With Power BI, you can set up useful dashboards yourself in a matter of hours. But for power with a capital 'P', you need to build the right data model and have the knowledge and ability to utilise the solution's advanced functions.

We have the skills and experience needed to help you use Power BI to unlock the true potential of your data.

Our multi-award-winning senior BI consultants and data analytics experts have built thousands of data models and hundreds of complex and powerful interactive dashboards. We understand the flow of information through organisations, how to manage and govern it, and how to tap into it effectively. We are also Microsoft's New Zealand Partner of the Year for 2016, and have gold competency in Business Intelligence and Data Platforms.

Datacom is a 4000 strong employee IT service business with offices in 17 locations across Asia Pacific. We provide software development, IT Managed Services and industry-specific applications.
